Your perfect wine storage solution

Cuvée Burgundy

Welcome to the refined world of Burgundy, a line of premium wine fridges designed to embody the elegance and tradition of its namesake. The "Burgundy" range offers a seamless blend of sophistication and practicality, making it a perfect addition to any wine lover's home.

Our freestanding models ensure effortless installation with no special modifications needed, making it simple to integrate into your living space. Whether you're a budding wine enthusiast or a seasoned collector, the Burgundy range boasts an unbeatable price-to-capacity ratio that ensures you get exceptional value without compromising on quality or storage space.

Crafted with aesthetics in mind, each unit features full wooden shelves and special display areas that not only enhance the overall look but also highlight your prized bottles beautifully. These design choices ensure that every Burgundy wine fridge is not just an appliance, but a piece of furniture that enhances your home décor.

Versatile and designed to cater to a wide audience, the Burgundy range is suitable for everyone—whether young or senior, professional sommeliers or casual sippers. Embrace the art of wine preservation with

Burgundy, where your wine collection can age gracefully and be ready to impress at your next gathering.

294 Bottle Dual Zone Free Standing Wine Cabinet

Cuvée Burgundy

Signature Features

294 Bottle Capacity

Ideal capacity for several types of customers:

- ✓ Serious Wine Collectors: Individuals who have an extensive collection of wines and are looking to store them in optimal conditions for aging and preservation. This size is suitable for collectors who are serious about maintaining a large and varied collection.
- ✓ Frequent Entertainers: Those who often host dinner parties, social gatherings, or wine-tasting events may find this size advantageous, as it allows for a wide selection of wines to be readily available and properly displayed.
- ✓ Restaurateurs or Wine Bar Owners: Businesses such as restaurants

2 zones of temperature

• A dual-zone wine fridge allows for the optimal storage of both red and white wines by providing two separate temperature-controlled compartments. This ensures that each wine variety is kept at its ideal temperature, enhancing preservation and readiness for serving.

Beech Wooden Shelves & Anti-Vibration System

• 5 wooden shelves give a premium look and feel, while assist in reducing vibration and allowing maximum use of internal space for your comfort

1 Display shelve

• Experience effortless selection with our display shelf, designed to showcase wine labels clearly

1 Multi use shelve

• Our versatile wooden shelf is crafted for multi-use convenience, allowing you to either stand wine bottles upright, or utilize the space for storing cheese and liquor, adapting seamlessly to your entertaining needs.

Double layer tempered glass

• Protect your wine collection from harmful UV rays, while keeping the interior insulated and moisture out

Precise Temperature & automatic humidity System

• Digital LED display and intuitive digital control to monitor and adjust for optimal temperature.

Charcoal filter

• Equipped with a charcoal filter to remove odors and purify the air inside, ensuring your wine is stored in the freshest environment possible.

Multi use shelf

Our wine fridge features a multi-use wooden shelf that caters to all your hosting needs. Perfect for standing up partially used wine bottles while elegantly displaying their labels, this shelf also serves as an elegant platform for presenting cheese, delicatessen meats, or liquor. It's the ideal shelf for enhancing any aperitivo experience.

Display Shelf

Display shelf often incorporate strategic lighting and glass fronts to showcase the labels and enhance visibility, making it easier to locate and organize your collection.

Flat Beech Shelf

Wine fridge shelves made from beech wood offer a functional and elegant solution for storing wine bottles efficiently and safely. Beech shelves are typically designed to store wine bottles horizontally. This orientation ensures that the wine remains in contact with the cork, keeping it moist and preventing air from entering the bottle, which could lead to oxidation.

294 Bottle Dual Zone Free Standing Wine Cabinet

Cuvée Burgundy

Features

- 268 Bordeaux bottles max capacity
- Free-standing installation
- Dual Zone (5-12°C / 12-20°C)
- N / ST Climate Type (16-38°C)
- Double layer tempered glass door
- Digital control
- Anti-UV glass door
- 5 beech wood shelves
- 1 Display shelve
- 1 multi use shelve
- Inside condenser
- Soft white LED light
- Anti-vibration system
- Winter function
- High efficiency compressor
- Quiet operation
- 2 Adjustable feet
- Fan cooling
- R600a Refrigerant
- Noise level 40 dB(A)
- 220-240V/ 50Hz
- 190 Kwh/annum

Aesthetics

- Full Glass door
- LED light
- Inside temperature control display
- Reversible door
- 4 Adjustable feet
- 2 wheels

Warranty

- Two (2) year parts and labor

**Extend your warranty by registering your product lecavist.com*

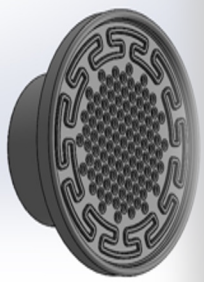
When the sensor detects that the humidity levels have dropped below the ideal range (typically 50-70% for wine storage), the system automatically uses the collected water to increase the humidity.



Charcoal filter

HUMIDITY

65% - 80% Humidity: This is the recommended range to ensure that the corks remain moist and pliable but not too wet. As corks dry and contract, the seal between the cork and the bottle may loosen, allowing wine to seep out. This not only leads to wine loss but can also expose the wine to more air, accelerating degradation.

CLEAN ODOR FREE AIR

Charcoal is highly effective at neutralizing odors, chemicals, and even contaminants in the air. These filters play a crucial role in purifying the air within the cooler, ensuring that no external smells affect the wine's quality. Wine corks are semi-permeable, allowing small amounts of air to pass through. This breathing process is essential for wine to age and develop complexity. However, it also means that any surrounding odors have the potential to penetrate the cork and affect the wine.

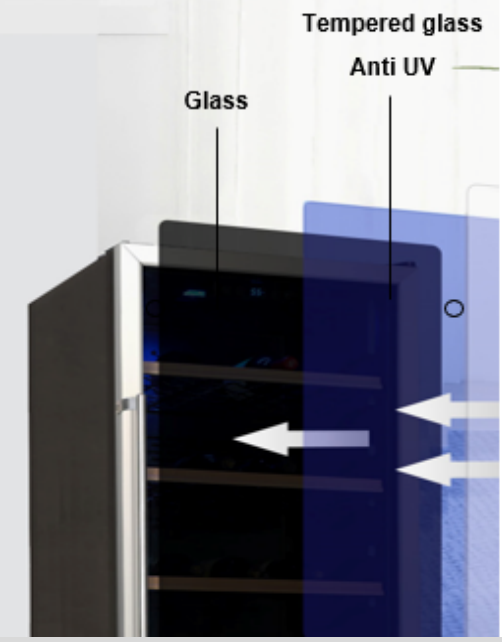
Cuvée Burgundy

PROTECTED GLASS



Especially designed for your wine,
Anti-UV coated glass to protect your wine from heat and light by creating a barrier from UV radiation and temperature changes.

A 2-layer glass door on a wine fridge, comprising standard glass, tempered glass, and Anti-UV film, offers several advantages:

1.Improved Insulation: The combination of different glass types and Low-E film enhances the insulation properties of the door. This superior insulation helps maintain a stable internal temperature, which is crucial for the long-term storage and aging of wine.

2.UV Protection: Low-E film plays a critical role in blocking harmful ultraviolet (UV) rays that can degrade and prematurely age wine. By filtering out UV light, the Low-E film helps preserve the wine's flavor and aroma integrity.

3.Energy Efficiency: The 2 layers reflects heat, keeping the interior of the wine fridge cooler without requiring as much energy. This not only helps in maintaining a consistent temperature but also reduces energy costs.
These layers work together to optimize the storage condition of wines, ensuring they are kept in an environment that supports their quality and longevity.
